PHYSIOLOGY AND BIOCHEMISTRY

Temperature changes in lipid and protein structure measured by Fourier Transform infrared spectrophotometry in intact pollen grains
by S. Sowa, K.F. Connor and L.E. Towill (Fort Collins, CO) 1–9

Changes in in vitro translated polypeptides of *Pharbitis nil* Chois., strain Violet cotyledons during the first flower-inductive and non-inductive photoperiods
by M. Ono, K. Yamada, K. Sage, M. Okazaki and H. Harada (Ibaraki, Japan) 11–18

Abscisic acid biosynthesis in *Zea mays* embryos: influence of tetcyclacis and regulation by osmotic potential
by H. Belefant and F. Fong (College Station, TX) 19–25

Hormone-mediated response to immobilized sugars in *Rubus* cells
by Y. Lienart, C. Gautier and H. Driguez (Grenoble, France) 27–31

Methylation of DNA in the chloroplasts and amyloplasts of the pea, *Pisum sativum*
by N. Ohta, N. Sato, S. Kawano and T. Kuroiwa (Tokyo, Japan) 33–42

GENETICS AND MOLECULAR BIOLOGY

A chromatin-associated histone deacetylase from pea (*Pisum sativum*)
by R. Sendra, M.L. Salvador and L. Franco (Valencia, Spain) 43–51

Oligomycin/venturicidin-resistance is due to a nuclear modification in a somatic hybrid between *Nicotiana tabacum* and a variant line of *Nicotiana sylvestris*
by M. Pla, C. Mathieu, F. Vedel and J. Durand (Orsay, France) 53–60

Developmental gene expression in conifer embryogenesis and germination. II. Crystalloid protein synthesis in the developing embryo and megagametophyte of white spruce (*Picea glauca* [Moench] Voss.)
by S. Misra and M.J. Green (Victoria, Canada) 61–71

A microassay for quantitative determination of β-glucuronidase reporter gene activities in individually selected single higher plant cells
by B. Sporlein, A. Mayer, G. Dahlfeld and K.U. Koop (Munich, F.R.G.) 73–80

Cryopreservation of apical meristems of white clover (*Trifolium repens* L.) by vitrification
by T. Yamada, A. Sakai, T. Matsumura and S. Higuchi (Sapporo, Japan) 81–87

CELL AND TISSUE STUDIES IN VITRO

Effects of cell type used for fusion on chromosome elimination and chloroplast segregation in *Brassica oleracea* (+) *Brassica napus* hybrids
by E. Sundberg, U. Lagercrantz and K. Glimelius (Uppsala, Sweden) 89–98

In vitro plantlet development from explants of 25-year-old trees of *Populus* × *euramericana* – a hybrid poplar
by V. Agrawal and S.C. Gupta (Delhi, India) 99–105

Enhanced anthocyanin production in grape cell cultures
by T.J. Hirasuna, M.L. Shuler, V.K. Lackney and R.M. Spanswick (Ithaca, NY) 107–120

Genotype-dependent response of spinach cultivars to in vitro callus induction and plant regeneration
by J.M. Al-Khayri, F.H. Huang, T.E. Morelock, T.A. Busharar and E.E. Gbur (Fayetteville, AR).. 121–127

Spontaneous shoot organogenesis and plant regeneration from hairy root cultures of *Hyoscyamus muticus*
by K-M. Oksman-Caldentey, O. Kivelä and R. Hiltunen (Helsinki, Finland) 129–136

Book Reviews 137–139
Announcement 141

PHYSIOLOGY AND BIOCHEMISTRY

Isolation of α-amylases and other starch degrading enzymes from endosperm of germinating maize
by D.A. Warner and C.A. Knutson (Peoria, IL) 143–150

Effect of *Phytophthora infestans* infection on superoxide dismutase dependent cytochrome *c* — reducing activities of leaves as related to resistance of potato plants to late blight
by D.G. Ivanova, N.V. Gughova, M.N. Merzlyak and G.V. Rassadina (Moscow, USSR) 151–156

Phytoalexin accumulation in groundnuts in response to wounding
by M.K. Arora and R.N. Strange (London, U.K.) 159–163

Inhibition and activation of wheat embryo calcium-dependent protein kinase and inhibition of avian myosin light chain kinase by long chain aliphatic amphiphiles
by W. Jinsart, B. Ternai and G.M. Polya (Bundoora, Australia) 165–173

Properties of submitochondrial particles from plant mitochondria: generation, surface characteristics and NAD(P)H oxidation
by P.X. Petit, P. Gardeström, A.G. Rasmusson and I.M. Møller (Gif-sur-Yvette, France; Umeå and Lund, Sweden) 177–183

Electrophoretic and immunological detection of legumin-like seed proteins in several monocot species including several tribes of the Poaceae
by D.S. Luthe (Mississippi State, MS) 185–192

Senescence of rice leaves XXIX. Ethylene production, polyamine level and polyamine biosynthetic enzyme activity during senescence
by C. Ten Chen and C. Huei Kao (Taiwan, Republic of China) 193–198

Metabolism of radiolabelled galactolipids in senescent barley leaves
by L. Wanner, F. Keller and Ph. Matile (Zurich, Switzerland) 199–206

Regulatory role of phytochrome in the induction of α-amylase activity in excised chick-pea cotyledons
by M. Casado, L. Martin, G. Nicolas and N. Villalobos (Salamanca, Spain) 207–215

GENETICS AND MOLECULAR BIOLOGY

Molecular evidence for interchromosomal recombination in the cyanobacterium *Synechocystis* sp. PCC 6803
by M. Gurevitz, H.D. Osiewacz and Y. Keren (Tel Aviv, Israel; Heidelberg, Germany) 217–224

Nuclease sensitivity of a maize HRGP gene in chromatin and in naked DNA
by M.P. Valles, J. Bernues, F. Azorin and P. Puigdomènech (Barcelona, Spain) 225–230

CELL AND TISSUE STUDIES IN VITRO

Mycobacterium scrofulaceum: a bacterial contaminant in plant tissue culture
by R.A. Taber, M.A. Thielen, J.O. Falkinham III and R.H. Smith (College Station, TX; Blacksburg, VA) 231–236

Transient expression of foreign genes introduced into barley endosperm protoplasts by PEG-mediated transfer or into intact endosperm tissue by microprojectile bombardment
by B.T. Lee, K. Murdoch, J. Topping, M.G.K. Jones and M. Kreis (Harpenden U.K.) 237–246

GENERAL

Roots, explants and protoplasts from pea transformed with strains of *Agrobacterium tumefaciens* and *rhizogenes*
by S. Schaerer and P.-E. Pilet (Lausanne, Switzerland) 247–258

Lipid bodies in tissue culture, somatic and zygotic embryo of *Daucus carota* L.: a qualitative and quantitative study
by P.C. Dutta, L.-Å. Appelqvist, S. Gunnarsson and A. von Hofsten (Uppsala, Sweden) 259–267

Subject Index Volume 78 269–271
